

Prior to the no call list in Wisconsin, the telemarketers called with such frequency it impacted our quality of life. We didn't want to answer the phone. It is reprehensible that having phone service subjects us to harassment by telemarketers. Please protect our right to privacy - I am not paying for phone service to provide an open line into my home for sales calls. These calls disrupt family life and make it difficult for individuals who work afternoon and night shifts to get any sleep.
